

Drain Treatment

Fat Attack

Fat Attack represents the next step in technology for the biological treatment of drain lines and grease traps. It is an environmentally friendly formulation that won't damage pipes and traps.

The microbial blend in Fat Attack controls odours and is effective in breaking down organic matter typically found in drain-lines and grease traps thereby reducing costly pump outs and eliminating the need for harsh chemicals.

The microbes found in Fat Attack are all designated Class I according to Council Directive 90/679/EEC (as amended by Council Directives 93/88/EEC and all other recognised classification systems for micro-organisms).

Putting You in Control

The "free on loan" dispensing pump is programmed to deliver a consistent dose of Fat Attack at periods of lowest flow i.e. early morning and late evening which allows for maximum retention time in the system.

More than a Chemical Supplier

Our Systematic Approach to Grease Trap Maintenance

TMH have been maintaining and improving grease trap efficiency in Ireland since 1996. We have learnt through experience that even the most effective biological treatment products are ineffective if not used correctly and because no two premises are the same, different solutions are often required.

For this reason we developed a comprehensive site survey form which allows our engineers to assess a premise and tailor a program that best suits the demands of each location. This unique 32 point analysis records grease trap volumes, pipe runs, meals prepared per day, housekeeping routine etc., all of which is vital to generate the optimum treatment program for each account. Each account is then closely monitored by our Account Managers.

Account Managers:

Prevention is better than cure so our industry trained Account Managers support our customers with scheduled visits to ensure optimum performance of product and equipment. They monitor PH levels, temperatures and solid waste levels, all of which are documented and retained on-site in the customers *Technical Support Manual*.

Technical Support:

Independent laboratory testing documents **FAT ATTACK** as being up to 26 times more effective than other drain treatments currently on the market. The strength of our product reduces the dosing rate which guarantees savings for our customers. Our technical experience allows us to partner with hospitality operators throughout the industry to provide customized solutions designed to keep facilities clean, safe and efficient.

Grease Trap Maintenance:

Our daily treatment system significantly reduces the amount of times a grease trap needs to be emptied. As part of our ongoing commitment to reduce down time for our customers, we provide a cleaning and emptying service for all of our customers. Our licensed and uniformed operatives will empty and clean any size grease trap at a time that causes least disturbance to your business.

Testimonials for FAT ATTACK drain treatment

Testimonial

Waterford Institute of Technology

Brian Chapman

"Within 4 days of FAT ATTACK being dispensed into the grease trap our staff noticed a considerable reduction in the odour. On inspection of the grease trap (one month later) the fats, oils and grease were completely removed. I was very impressed with the product and the technical staff at TMH were helpful, knowledgeable and very accommodating".

Rating ★★★★★

Testimonial

Kilkenny River Court Hotel

Tom Walsh

"We changed to FAT ATTACK in 2009 and since the installation we have had no problems with the drains, pipes or grease trap".

"We are very happy with the product and service and have no hesitation in recommending TMH Facility Solutions".

Rating ★★★★★

Testimonial

Hasbro Ireland

Norman Pearson

"We have used FAT ATTACK drain treatment for many years. It helps to eliminate bad odours and reduces the amount of times we have to empty the grease trap. I find TMH Facility Solutions to be very diligent & professional at all times. They are punctual each month when the product needs to be replenished and they provide an excellent service when the grease trap needs to be emptied".

Rating ★★★★★

Testimonial

Smart Ply

Anne Lucey

"FAT ATTACK works. It emulsifies the fats, oils and grease in our grease trap and the results are visible. TMH provide us with a quality service and I have no hesitation in recommending them to potential customers".
