

# TMH Fat Attack System

## Our Daily "Fat Attack" System

The "TMH **Fat Attack** System" has been designed to deliver a regular and consistent dose of drain degreaser which reduces the buildup of troublesome fats and oils in drains and grease traps. **Fat Attack** is a safe and economic degreaser which biologically digests grease and other organic waste buildup and turns it into carbon dioxide and water. When used correctly, the micro-organisms in **Fat Attack** break down and digest all solid waste on contact thereby keeping drain lines and grease traps functioning as new.

- ✓ Free On-Loan Dosing System\*
- ✓ Free Installation & Technical Support
- ✓ Eliminates Costly Blockages & Cleaning
- ✓ Immediate Results & Cost Savings
- ✓ Free Chemical Delivery
- ✓ Free Servicing
- ✓ Zero Running Costs
- ✓ Maintenance & Trouble Free

## Putting You in Control

The TMH dispensing pump is programmed to deliver a consistent dose of **Fat Attack** drain degreaser at periods of lowest flow i.e. early morning and late evening which allows for maximum retention time in the system.
